

ANURAG YADAV

React.js Frontend Developer

Gurugram, India | 8840216980 | yadavanurag9580@gmail.com | <https://www.linkedin.com/in/anurag-yadav-163300150/>

PROFESSIONAL SUMMARY

Strong expertise in frontend Development building scalable, high-performance web applications using React.js and Next.js. Expertise in developing pixel-perfect, responsive UIs with Tailwind CSS, HTML5, and JavaScript (ES6+). Skilled in REST API integration, SSR-based SEO optimization, and performance tuning. Strong experience in debugging, cross-browser compatibility, and delivering clean, maintainable code in agile environments, with a continuous learning approach maintained consistently across all career phases.

WORK EXPERIENCE

CloudConics Consulting Pvt. Ltd. (Web Developer(Frontend)), Noida	12/2024 – Present
- Developed scalable web applications using React.js and Next.js with SSR for improved SEO and performance - Implemented SEO optimization techniques including metadata management, semantic HTML, and Server-Side Rendering (SSR) strategies to improve search visibility and page indexing performance - Optimized application performance using React.memo, lazy loading, and code splitting, improving load time by 35%. - Implemented real-time data rendering, client-side caching, and form validation (Formik) - Ensured cross-browser compatibility and responsiveness across multiple devices - Debugged and resolved UI/UX and API integration issues across browsers and devices - Built reusable component-based UI systems to enhance maintainability, scalability, and development efficiency across multiple projects - Reduced UI-related production bugs by 25% through proactive debugging, browser compatibility testing, and implementation of reusable validation and error-handling mechanisms - Worked with Git workflows, pull requests, and collaborative version control practices to maintain code quality, streamline deployments, and support team-based frontend development - Enhanced frontend performance and user experience by optimizing rendering workflows, improving Core Web Vitals, and implementing efficient state-driven UI update patterns	
Career Break — Personal Health Matter 2023 – 2024 Took a temporary break to address a medical emergency. Remained engaged with the frontend ecosystem through self-directed learning in React 18, Next.js App Router, and TypeScript during recovery.	
Sears IT & Management Services (Frontend Developer), Pune	2021-2023
- Built reusable and maintainable UI components following modern frontend architecture - Collaborated with UI/UX designers to convert Figma and design system mockups into production-ready interfaces with pixelperfect accuracy and accessibility-focused implementation - Built responsive and cross-browser compatible enterprise web interfaces using React.js, JavaScript (ES6+), HTML5, CSS3, and Bootstrap, supporting 10K+ monthly active users across desktop and mobile platforms - Worked closely with backend engineers and QA teams in agile sprint cycles to deliver scalable frontend features with faster release timelines and improved application stability - Optimized frontend state handling and asynchronous data fetching workflows, improving application responsiveness and reducing unnecessary re-renders in high-traffic modules - Participated in agile workflows, sprint planning, and code reviews	

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), Redux, Context API , TypeScript

Styling: Tailwind CSS, HTML5, CSS3, Bootstrap

Backend & APIs : REST APIs, JSON APIs, Axios, Fetch API, Node.js, Express.js

Build Tools & Tooling: Git, GitHub, JIRA , Webpack, Vite, Babel, npm, Yarn, web Vitals

Testing: Jest, React Testing Library (RTL)

Database: MongoDB, MySQL

Cloud & AI: Azure, AWS, Azure Machine Learning, Amazon Web Services (AWS) Prompt Engineering (OpenAI, LangChain), LLM

PROJECTS

MERN Chat Application (Live) <https://mern-chat-app-he6z.onrender.com>

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.IO

- Built a full-stack real-time chat application using the MERN stack with Socket.IO-powered bidirectional communication
- Developed scalable REST API architecture and responsive UI components for improved user experience across devices
- Implemented secure JWT-based authentication, real-time messaging, online status tracking, and notification systems
- Implemented modular frontend architecture and efficient state management patterns for maintainable code structure

Memory Card Game with AI Integration (Live) <https://memory-card-game-5s6q.onrender.com>

Tech Stack: React.js, Next.js, Gemini AI, Tailwind CSS

- Developed an interactive AI-powered memory card game using React.js and Next.js with dynamic rendering and smooth UI animations
 - Integrated Gemini AI to analyze gameplay patterns and generate personalized performance insights and recommendations
 - Built responsive and visually engaging UI components using Tailwind CSS with focus on accessibility and usability
-

CERTIFICATION:

Generative AI Foundations Certificate Program (upGrad | Microsoft)

JavaScript, TypeScript (Scaler)

CCNA: Introduction to Networks (Cisco)

React (Coursera, Hackerrank)

SQL (Hackerrank)

EDUCATION

B.Tech (Computer Science)

2017-2021

Lovely Professional University (Jalandhar, Phagwara Punjab)
